FINANCING THE GREEN SHIFT: UNLOCKING CLIMATE CAPITAL FOR EMERGING MARKETS

5 June 2025

Net-Zero Industries Mission (NIM)

The challenge

- Energy-intensive industries (steel, cement, chemicals, and users of high temperature heat) are responsible for around **25 % of GHG emissions worldwide**
- Energy-intensive industry is **the most expensive sector to decarbonize**
- Some low carbon **technologies are not yet available at commercial scale**

Mission Goals

- ✓ Support the global implementation of at least **50 large-scale demonstration projects** by 2030.

- ✓ Fast-track the development of **breakthrough low-emission technologies to TRL 8.**

- ✓ **Reduce capital expenditure** on low-emission innovative technologies **by over 15%.**

Agenda

Welcome

by the Net-Zero Industries Mission and The Alliance for Industry Decarbonisation

Financing the Energy Transition in Industrial Sectors

Maysam Kanani Amiri, Senior Advisor, Treasury & Corporate Finance MEA, Siemens Energy LLC

Strategic Finance for Sustainable Industry in Emerging Markets

Hien Minh Tran, Climate Finance Officer, United Nations Industrial Development Organization (UNIDO)

Scaling private sector investment in industrial decarbonization across emerging markets

Tuyen D. Nguyen, Global Lead for the Climate Business Department, International Finance Corporation (IFC)

Closing the Trust Gap to De-Risk Climate Investments

Bratin Roy, Chair of AFID Green Financing WG, Global Head of Decarbonization, TÜV SÜD

OECD's new Financial Toolkit for Financing Industry Decarbonisation

Joseph Cordonnier, Policy Analyst, Organisation for Economic Co-operation and Development (OECD)

Panel Discussion & Live Q&A

Practical Pathways to Green Finance Access: Multiple Perspectives
